

### Technology Consultant

Are you looking for a role where you will combine your passion for technology with your innovative and outgoing personality? KorteQ is looking to recruit an entry level technology consultant with a strong IT background and a hunger to learn, into our growing and dynamic team.

#### **The Company**

KorteQ is a specialist management consultancy. We work with our clients to accelerate learning, reduce risk and improve performance through **effective knowledge transfer**. The effective use of the latest social and collaborative technologies plays a key role in implementing many of our solutions and is an ever-growing aspect of the business, as we build intelligent processes and information-rich ways of working for our clients.

#### **The Role**

Technology Consultants are involved at every stage of client projects, providing a full life-cycle service from discovering client needs and developing winning concepts right through to delivery of first-class solutions. Projects in technology services typically involve:

- proactively eliciting, suggesting, analysing and prioritising requirements
- creating and proposing innovative solutions
- creating demonstrator concepts for clients
- designing and developing the agreed solution according to industry best practice
- managing post-implementation disciplines in order to ensure that the target business case is achieved

As an entry-level candidate, you will initially focus on the technical aspects of the work and, with the support of focused training, develop the further skills you require.

#### **The Person**

The successful candidate will have an IT-related degree and a genuine interest in developing advanced, technology-driven solutions to commercial problems. Outgoing and personable, you must be able to succeed in a client-facing role.

Understanding of concepts such as SaaS, enterprise 2.0, social computing and virtual team collaboration coupled with experience of related products, such as MS SharePoint, SocialCast and Yammer, would be highly advantageous. The key requirements are enthusiasm and a track record of developing IT solutions, preferably using web-based technologies, in either an extra-curricular or business /study based environment.

#### **The Rewards**

Innovative cutting edge work, early responsibility, personalised progression plans, team away days and a competitive salary/bonus package are available for the successful candidate.
